[LDIA 2021] Conference Paper Submitted to IEEE Transactions on Industry Applications (IEEE T IA)

Dear authors,

We are pleased to inform you that your papers for 2021 13th International Symposium on Linear Drives for Industry Applications (LDIA) are now available on IEEE Xplore. If you are preparing to submit your conference-based papers to IEEE Transactions on Industry Applications, the following information can be taken as your reference.

****

An updated version of your conference paper is eligible for review by the IEEE Industry Applications Society for possible publication in the Transactions or Magazine if it is submitted for review within one year after the date of presentation and if the paper is within the scope of the IEEE Industry Applications Society (the deadline for IEEE TIA is due to 03 July 2022). When you are within 30 days of completing the updates described below, please respond to this email message with

1) a copy of your updated paper or conference paper in PDF format, and

2) confirmation of the following information for the one person who will be the contact person for the paper.

Contact Author Name:

Contact Author Affiliation:

Contact Author ID on IAS ScholarOne website:

(If the contact author does not have an IAS ID, please register at https://mc.manuscriptcentral.com/ieee-ias)

The paper and information about the contact author should be sent to eic-tia@ieee.org ((Dr. T. A. Nondahl)) or directly to an IAS Papers Review Chair (You can find it by the website of IEEE TIA).

IEEE Journal papers based on conference articles must have "substantial additional technical material with respect to the conference article or articles". Examples of possible updates are improved text, new figures, and/or additional experimental results. Authors should update at least 20% of the technical material in a conference paper before submitting the manuscript to IAS for review.

There are three additional requirements for the updates:

1) the conference paper must be added to the references of the updated paper, 2) authors must very clearly indicate how the new submission differs from the conference paper,

3) all authors of the conference paper should be included as authors of the updated paper. Conference paper authors who are not included will be asked to verify they agree to be removed.

The paper sent to Editor in Chief of IEEE TIA or the Papers Review Chair will be used to select an IAS Technical Committee to conduct the review. The Papers Review Chair of the committee will send you instructions for uploading the updated paper to ScholarOne if your paper is within the scope of the committee. You will have 30 days to upload your paper to the IAS paper review website after receiving the instructions from the committee.

****

Thank you very much for your excellent contribution to LDIA 2021. We are looking forward to seeing you again in Hannover, Germany, for LDIA 2023!

Sincerely,

Editing and Publishing Committee, LDIA 2021
